Auto Sanitizer Dispenser with Kiosk

Using hand sanitizers has become paramount in office spaces and commercial establishments in lieu of the current global pandemic to save people from transmitting the infection from their hands to the nose and mouth.

This **auto sanitizer dispensing machine** with **kiosk** helps in touch free sanitization of people's hands with its automatic sanitizer dispensing system. It has been built with an intelligent sensory system that dispenses about 2-3 ml of the antimicrobial solution every time when the user puts their hand inside the kiosk.

It also has an intuitive screen that can be used for promoting any product or brand or to warn people with health related content. And you will be able to control the unit remotely by accessing its centralized control system.

This unit is available at a capacity of 20 liters, but can be improvised to accommodate multiple tanks and variant screen sizes.

This **Auto sanitizer dispensing system** comes with a **one-year warranty** and a **free remote license** for 12 months.
